Macchine complementari

TC8-TC10

descrizione:

Automatic Toe Closer for knee-highs and stockings.
The simplicity of operation facilitates the installation and the use of the machine, enhances reliability and reduces operation and maintenance costs. "Santoni Toe Closer" offers a great flexibility with the possibility to shape the toe of a wide range of products (from small women's socks to large single legs of pantyhose). Available a basic version with 8 tubes (TC8) or a more flexible with 10 tubes (TC10) with the possibility to fit the heel and toe positioning device or the body slitting device.
PLC for the electronic control of all main functions of the seaming cycle.
Electronic self-diagnosis with visualized errors or malfunctions.
Touch screen display for the machine setting with possibility to store different sewing programs.
Qty. 8 or 10 sewing tubes with interchangeable blades.
Toe shaping by means of a toothed belt with adjustable profile.

OPTIONALS

Sewing head with twin needles.
Toe positioning kit with color detector.
Double unloading bag with switching valve.
 Possibility to use a Pick & Place for the automatic loading.
Heel/toe positioning kit.
Slitting device.
