AUTOMATIC LOADING SYSTEM FOR PANTYHOSE SUITABLE FOR LINE CLOSERS (LC) AND GUSSET LINE CLOSERS (GLC)

P&P-S2 + AL2

## AUTOMATIC SEWING SYSTEMS

### P&P-S2 + AL2

Automatic loading system for pantyhose suitable for Line Closers (LC) and Gusset Line Closers (GLC).

This system comprises of a new Pick & Place robot, with reduced sizes, which picks up hosiery tubes piled in a trough and, once oriented (toe and welt), are sent by air to the automatic loader AL2.

It is possible to automatically load many models of LC and GLC, and for these Santoni can also supply a positioning device NPD to position the waistband and the body-leg change, and also styles with T-bands and bikinis.

The simplicity of this system allows an easy adjustment of the machine when changing styles, and gives a high level of efficiency, which is very advantageous when loading subsequent machines.
